Risk Management Schedule

Long Stratton Town Council takes its responsibilities to staff and to the management of public property and finance seriously and will carry out a review of risks annually in March.

"Risk" is here defined as the threat that an event or action will adversely affect the council's ability to achieve its objectives or enact its strategies. "Risk management" is the process by which risks are identified and evaluated with a view to exercising control and mitigation. This risk management scheme therefore forms a framework by which the town council can take steps to minimise identified risks.

Key risk management scheme objectives: 1. Identify risks facing the council. 2. Identify the level of risk. 3. Evaluate the management and control of the potential risk. 4. Assess and review the risk management scheme annually.
